

Doctoral Internationalization Consortium in Information Systems

June 26–28, 2008

Michael G. Foster School of Business
University of Washington

Faculty Participants' Biographical Sketches

Debabrata Dey Professor of Information Systems and McCabe Fellow at the Michael G. Foster School of Business, University of Washington, Seattle. He is currently the Chairman of the Department of Information Systems and Operations Management. Dey's main research interests are in the area of distributed heterogeneous information systems involving large databases and telecommunication networks. More specifically, he is interested in studying business issues related to data warehousing, network pricing and performance, data uncertainty, and database design. His other interests include expert systems and software engineering. His research has been published in *Management Science*, *Operations Research*, *Information Systems Research*, *ACM Transactions on Database Systems*, *IEEE Transactions on Knowledge & Data Engineering*, *INFORMS Journal on Computing*, *VLDB Journal*, *Decision Support Systems*, and *Data & Knowledge Engineering*. Dey currently serves as Associate Editor for *Management Science*, *Information Systems Research*, and *Information Technology and Management*. Previously, he has served as Associate Editor for *MIS Quarterly* and *INFORMS Journal on Computing*. He has served on program committees for several international conferences and workshops, such as ICIS, WITS, and ER. He was the program co-chair of WITS-2003 and the chair of ancillary groups in ICIS-2003. He was a co-chair for the track of completed papers in ICIS-2001.

Ming Fan is Assistant Professor of Information Systems at the Michael G. Foster School of Business, University of Washington, Seattle. He received the Ph.D. degree in Management Science and Information Systems from the University of Texas at Austin. His research interests include economics of information technology, online community and social network, digital media, supply chain management, and the use of information technology in financial services companies. He has published in *Information Systems Research*, *IEEE Transactions on Knowledge and Data Engineering*, *Journal of Management Information Systems*, *European Journal of Operational Research*, *Decision Support Systems*, and *Communications of the ACM* among other journals. He is a co-author of the book *Electronic Commerce and the Revolution in Financial Markets*. He is also an Associate Editor of *Decision Support Systems* and serves on the editorial board of *Decision Sciences* and *Journal of Database Management*.

Xianjun Geng is Assistant Professor in Information Systems at the Michael G. Foster School of Business, University of Washington, Seattle. He received his Bachelor of Engineering, Bachelor of Economics, and Master of Engineering from Tsinghua University, Beijing, China, and Ph.D. in Information Systems from the University of Texas at Austin. His research interests include the economics of e-business, strategic information distortion and trust, and new information technology and systems. His work has appeared or is forthcoming in academic journals including *Management Science*, *Information Systems Research*, *MIS Quarterly*, *Journal of Marketing*, *Marketing Science*, and *Journal of Management Information Systems*. He is an Associate Editor of *Decision Support Systems*. At University of Washington he has won Lex N. Gamble Family Award for Excellence in the Field of E-Commerce (2005) for his research, and Undergraduate Instructor of the Quarter (Autumn 2005, nominated again in Autumn 2007) for his teaching.

Paulo Goes is the Gladstein Professor of Information Technology and Innovation at the School of Business of the University of Connecticut. He received his PhD from the University of Rochester. His research interests are in the areas of design and evaluation of models for e-business, emerging technologies, online auctions, database technology and systems, and technology infrastructure. His research has appeared in several journals including *Management Science*, *MISQ*, *ISR*, *Journal of MIS*, *Operations Research*, *INFORMS Journal on Computing*, *IEEE Transactions on Communications*, *IEEE Transactions on Computers*. Dr. Goes is Senior Editor of *Information Systems Research*, and Associate Editor of *Management Science*, *Decision Sciences*, *Journal of Management Information Systems*, *Production and Operations Management* and the *INFORMS Journal on Computing*. In 2004 he co-chaired WITS, the Workshop on Information Technology and Systems, and was recently elected the WITS Organization President. He is the co-founder and director of CIDRIS, a research center dedicated to research with Internet data.

Alok Gupta is Carlson School Professor and Chairman of Information and Decision Sciences (IDSc) Department at Carlson School of Management. His areas of specialization include process management, data communication, electronic commerce, design and evaluation of electronic mechanisms and processes, mathematical modeling of information systems, large-scale systems simulation, and economics of information systems. His research has been published in various top ranked information systems, economics, and computer science journals such as *Management Science*, *ISR*, *INFORMS JOC*, *CACM*, *JMIS*, *Decision Sciences*, *Journal of Economic Dynamics and Control*, *Computational Economics*, *Decision Support Systems*, *IEEE Internet Computing*, *International Journal of Flexible Manufacturing Systems*, *EJOR/IJEC*, *Information Technology Management*, and *Journal of Organizational Computing and Electronic Commerce*. He was rated among top 20 researchers in IS researchers in the world based on his publication activity in multiple studies published in 2006. He was a recipient of prestigious *NSF CAREER* award for his research in Online Auctions. He serves on the editorial boards of several academic journals such as *ISR*, *JMIS*, *DSS* and *Brazilian Electronic Journal of Economics*. He also holds the position of publisher of *MIS Quarterly*, the top rated journal in the field of MIS.

Sumit Sarkar is Ashbel Smith Professor of Information Systems and Academic Director of International Center for Decision and Risk Analysis at School of Management, University of Texas at Dallas. He received his PhD in Computers and Information Systems from the Simon School of Business at the University of Rochester, his PGDM from the Indian Institute of Management Calcutta, and his BTech from the Indian Institute of Technology Delhi. His research interests are in business intelligence, personalization and recommendation technologies, data privacy and confidentiality in shared databases, information quality, the integration and reconciliation of data from multiple sources, knowledge representation, software release, and knowledge management. His research has appeared in *Management Science*, *Information Systems Research*, *ACM Transactions on Database Systems*, *IEEE Transactions on Knowledge and Data Engineering*, *The INFORMS Journal on Computing*, and several other journals and conference proceedings. He has served as the program co-chair for the *International Conference on Information Systems (ICIS)* in 2001 and the conference co-chair for the *Workshop on Information Technology and Systems (WITS)* in 1999, in addition to serving on the program committees for many international conferences. He has served as a Senior Editor for *Information Systems Research*, and is on the editorial board of *Management Science*, *Risk and Decision Analysis*, and *Information Technology and Management*, among other journals. He is a member of the ACM, the AIS, the IEEE Computer Society, and INFORMS. He serves on the advisory board for WITS, the INFORMS Subdivision Council, and on the steering committee for CIST.
